
HKS to Showcase Latest Customization Concepts and Complete Models at Tokyo Auto Salon 2026

Customize Anything. Drive Everything. — Delivering the Best Tune for Every Car
~From the latest models to classics, HKS delivers customization the HKS way~

HKS Co., Ltd. (Headquarters: Fujinomiya, Shizuoka; President & CEO: Daisuke Mizuguchi) will exhibit at Tokyo Auto Salon 2026, held from Friday, January 9 to Sunday, January 11, 2026, at Makuhari Messe, Chiba. The HKS booth will be located in West Hall 1, No. 109.

HKS Booth Preview

■ Exhibition Theme

HKS will exhibit under the theme “Customize Anything. Drive Everything.,” displaying vehicle packages that reflect HKS-style customization for both the latest models and existing vehicles.

- **Packages for Latest Models:** Display of tuning parts optimized for current models.
- **Complete Concept “THE HKS”:** A new proposal as a flagship model in HKS’s vehicle sales business.
- **Neo-Classic Parts:** Introduction of newly developed items that combine modern technology with iconic classic cars.
- **Evolution of Key Items:** Presentation of upgraded models at Tokyo Auto Salon, including new proposals in suspension systems that enhance driving performance.

In addition, HKS will share information on advanced R&D projects applying tuning technology and initiatives for the next generation, contributing to the further development of automotive culture.

■ Show Vehicle Lineup

① HKS Racing Performer FL550R

The HKS Racing Performer FL550R is developed with a focus on time attack at Tsukuba Circuit Course 2000. Using current and upcoming HKS parts as the core components, we continue development by identifying which OEM parts need to be upgraded to achieve further time improvements, aiming for even higher performance.

During the initial shakedown run at Tsukuba Circuit, the car achieved a 58-second lap using the stock turbine combined with HKS parts. With the goal of delivering controllable yet high output performance, we are thoroughly refining the suspension setup and aerodynamics. To push lap times even further, the HKS GT Turbo has now been installed. Please look forward to continued time improvements in the future.

The photo shows the FL5 Civic Type R demo car exhibited at Tokyo Auto Salon 2025

- Base Vehicle: Honda Civic Type R FL5
- GT Sports Turbine KIT + High-efficiency cooling+ Optimized suspension and aerodynamic parts deliver both high power and excellent handling

②THE HKS GT-R R35 MY24 NISMO Dimension Z

This model is based on the top-tier special grade “NISMO SPECIAL EDITION (MY24)” of the R35 GT-R. It comes fully equipped with the latest HKS products and features numerous one-off parts designed exclusively for this vehicle, making it a perfect representation of “THE HKS.”

This photo shows the R35 GT-R demo car displayed at TAS 2024

- Base Vehicle: Nissan GT-R NISMO SPECIAL EDITION MY24/R35
- VR38DETT Complete Engine “4.3L STEP Pro+” + Equipped with the new GT5565_BB Turbo
- Ultra-high output specification targeting 1,300hp
- Comprehensive new developments have been carried out for each major component, including a variable muffler, variable suspension, various control parts, and a reinforced GR6 transmission.
- This vehicle also features a wide range of regulation-free aerodynamic components, including a front diffuser with an upsweep design and a GT wing equipped with a DRS (Drag Reduction System). These specially engineered aero parts work together to deliver optimal overall balance.

③THE HKS GR YARIS Gen2 Dimension Y

Created as a concept model for HKS’s vehicle sales project “THE HKS,” the GR YARIS Gen2 Dimension Y combines HKS’s extensive total tuning expertise with the added value of “the joy of ownership.” This vehicle is set to become a new benchmark for GR Yaris tuning going forward.

This photo shows the GR Yaris demo car displayed at TAS 2025.

- Base Vehicle: Toyota GR Yaris Gen.2/GXPA16
- Newly developing full turbo kit + additional injector control via the “Power Editor R”
- Improved cooling with the “Transfer Oil Cooler” + “BODY KIT TYPE-S”, under diffuser, and one-off rear wing with enhanced downforce, achieving both high aerodynamic performance and styling.
