
HKS × Defi φ60 Gauge Limited Collaboration Model Unveiled for the First Time at Tokyo Auto Salon 2026

- Classic designs revived with modern technology. Announcing a limited-edition model featuring orange numerals that stand out on neo-classic styles. -

HKS Co., Ltd. (head office: Fujinomiya City, Shizuoka Prefecture; President and CEO: Daisuke Mizuguchi; hereinafter “HKS”) will release an additional gauge set as the second collaboration project with the “Defi” brand developed by Nihon Seiki Co., Ltd. (head office: Nagaoka City, Niigata Prefecture; President and CEO: Keiichi Nagano).

The product will be unveiled for the first time at TOKYO AUTO SALON 2026 in January 2026 and is scheduled for a limited-quantity release around summer to autumn 2026.

※The actual design and colors are subject to change.

■ Background of the partnership

At TOKYO AUTO SALON 2025 in January 2025, HKS and Defi announced a collaboration that combines the technical strengths of both companies. As the first phase of that collaboration, they launched an integration between HKS's F-Con V Pro Ver3.4 and Defi's Defi Sports Display F.

The additional gauge project announced this time is the second phase: a concrete product that advances the collaboration and will appear as a limited model leveraging the strengths of both companies.

■ Product Overview

Product name: HKS ADVANCE LINK METER SET (limited edition)

Contents: Set of three φ60 electronic meters (boost gauge [200 kPa], oil temperature, water temperature) Dedicated design control unit

Features:

A set of HKS-original design meters and control unit based on the Defi ADVANCE series
Design reminiscent of classic HKS electronic meters, matching neo-classic car interiors

Release period: Scheduled for summer–autumn 2026

Sales channels: Global

■ **Features of this collaboration**

This product follows the design of HKS's popular electronic meter models from the past and adopts an orange-numeral layout. It will be offered as a modern collaboration model that pays homage to the company's history and evokes the look of classic cars.

Combined with the first-phase integration announced earlier — the link between F-CON V Pro and the Defi Sports Display F — this HKS × Defi collaboration delivers a comprehensive, total collaboration concept that brings new value to the market.
